Section 7

Color and Finish Options

What's standard on an H&H trailer for paint?

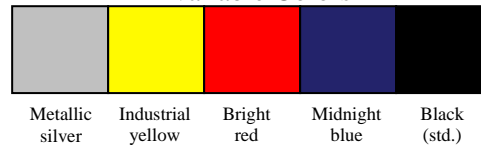

Though NOTHING is bulletproof, the best overall finish for any steel substrate is still a very hot pressure wash with a high acid content phosphate solution followed by a base steel primer (DuPont[®] is our choice) followed by a high quality enamel paint. We choose DuPont[®] as our total finish system.

Available Colors

- Black Gloss..... No Charge
- Metallic Silver..... No Charge
- Midnight Blue..... No Charge
- Industrial Yellow No Charge
- Bright Red..... No Charge
